Over at the westwood FTP, you can download the all new LFDS build that fixes all known bugs.

<ftp://ftp.westwood.com/pub/renegade/dedicatedserver/linux-beta>

From the readme:

03/01/03 - linux specific fixes.

Fixed custom maps.  
Fixed command line options.  
Fixed remaining unicode issues - player\_info on rh8.0, player leaving/joining  
game messages, suicide messages, team change messages.  
Fixed resultsNN.txt files.  
Fixed extras characters and re-enabled them.  
Fixed extra skin on Mobius.

Enjoy, and note that this is probably the last LFDS build we'll ever see. Kudos to Greg for this

Please keep this thread ontopic.

Turned off annoying spam of Registry-related warning messages.
