Does anyone know what the sound file names are for the radio commands? I know I can get them via XCC but I don't really want to go through a list of like 1000 .wavs to find them. (By radio commands I mean like Building needs repiars! etc..)

They're all prefixed with M00_Rado_xxx etc etc or something like that. XCC orginizes them into alphabetical order of filetype > filename so just look through the M00 section for rado or something like that.

There'll be 30 of them, all together.
