it's not the arrow that does the magic, it are the scripts attached to the arrow. better take a look at the properties of one placed in a ww map.

The only script that would be needed would be "Test_Cinematic" the infantry drops them selves are cinematics, so use "Test_Cinematic" to trigger them.

First you need JFW's scripts in you mod's folder, in a folder called scripts.
Second you need the name of the cinematic you want to use (.txt is required).
Third the "Test_Cinematic" script will activate automatically when the object it is attached to is created.

Fourth just call me Jerad (I have yet to see another Jerad in Renegade Public Forums).
