ok i got the new BR made for APB.. but i can get it running but.. i cant move ppl to different teams
cause it says it needs SSAOW logs.. but ther is no SSAOW for apb yet.. plz help..

You might want to read around a bit.. someone (danpaul I believe) explained that BR's
functionality is limited for APB, since there is obviously no SSAOW or updated scripts.dll..

There is an SSAOW in development for APB, which will enable many of BRenBot's additional
features. Until that gets made public you won't be able to use all the commands.

ssapb is what its called.
its pretty much fully functional by now.
