Close LE
Go to your start menu
Right click the LE shortcut, select properties
Go to the compatibilty tab
Tick the Disable Visual Themes box
Click OK
Open LE again.

As far as I know full screen in LE is broken and cannot be fixed. LE looks like a program from an old version of windows because visual themes (the rounded title bar etc) are disabled for it. This is

a side effect of the fix for Level Settings, you either have rounded title bars or Level Settings working...

i dont know about that bt i'm using APB LE becuase i dont like renegade level edit and i use APB LE for renegade because renegade level edit is sucks

so then if renegade LE is too old what about the APB level edit is you dont know the APB level edit just dont page me becuase i want some tihng a bout APB level editor

apb level editor is the same as the renegade level editor with a few hex changes....

If APB's level edit is any different than Renegade's it would only be jonwil's level editor (which is a modified version of Renegade's) just with hex and/or Registry changes.

Me?

I hope not, because I don't think I paged you.

I assume he means he subscribed to the topic and each time we reply he gets an email. Just for writing in big, annoying capitals I am going to reply again.

BTW: Click unsubscribe at the top of the page to stop getting emails about new posts

Do you think he is saying his question is answered, because if it is then I'm just sending you an email notification, unless you have unsubscribed form this topic, guess we will find out.
