hi can u guies help me with renguard i need it for clans.

I can't install it for some reason i use to have it.

it says when i try installing(renguard) game2.exe already exists can not install.

Sounds to me like you already have it installed. I can suggest the RG FAQ here:

I can't find it...

Here it is: <http://www.renegadecommunity.com/page.php?link=rgfaq>

See if any of those help you.

(Got there first Goztow )

seems like an easy solution to me look in your data folder for game 2 if u haven't already or search your computer for "game 2" if that does not help delete all of your renegade files and reinstall it.

Installing ren and rg in a different directory should solve the registry problems that you may have.

I would just uninstall RenGuard and Renegade, delete the Renegade folder(s), and reinstall. It seems like you messed something up that we can't figure out easily without more information.
