Hello All

I recently came back to renegade after a while out, and Installed and went to play online and every time I get: Requesting Server List, then Operation Timed out. I've reinstalled once and left it for a day and still happening.

I use wireless, but it never affected it before. WOL is port forwarded

Any Ideas? I'm desperate to play again

Cheers

Briantwigley

Check to see if your login & password is correct. Also, your serial key might be a problem.

Sounds like a firewall problem to me.
