Is there a way to remove the playername displayed on the characters ingame?

Second:

Is there a way to remove the rectangle around the things which appear while targeting them?

And third:

Can you remove the Hud completly or at least the radar only?

And the last question:

How can i make teleporter which work only for one team not for both?

Through scripting and creation of the hud.ini file.

Check not targetable (note this will also make the health not appear).

And the last question:

How can i make teleporter which work only for one team not for both?

Attach the script "TDA_Teleport_Zone" to a script zone (1=GDI 0=Nod 2=Both).

Yes. In your Renegade multiplayer options uncheck view ingame names or something like that.

wow. thank you very much! I knew the not_targetable funktion. I used it a few years ago and it kept crashing all the time, but now it works fine. I think they patched it

I can't find the Hud.ini

I tried to extract it from the game, but it isn't there.

You have to make it yourself.
