Through an anonymous source at Westwood Studios, also a friend of mine, I've received a load of the old vehicles for Renegade from even before the E3 show. Medium Tank:

I could care less about the mediam tank or recon bike, but the harvester is ugly. The light tank looks like an awesome addition to any mod. The flame tank looks like it should from the

playstation version of a movie inbetween the missions when the flame tank enters the town burning everything. Awesome, i cant wait until they're implemented.

I tested out Sparxxx's Arty vehicle on a map. The model is very good, it works extremely well. Only one fault i found that is probably 1 click to fix is the texture on the tracks moves horizontally instead of vertically. I took some screenshots of it when i was testing it on the map but n00bstories image upload is not active temporarily. Sparxx you did a great job with this model, how long did it take you? I'll upload the images when i can. Pics here:

Most of those models are way better than the ones in Ren now. Until they are in your next mod project ACK, I'll be waiting very patiently.

ACK is a party-pooper. He never releases any models because he thinks he's 'bad'.
