Ya cause if your on here you shouldnt have a problem to go online. Just dont let your brother on your account or let him use cheats, cause if he gets banned, you will get banned.

Let me guess, your error said something like

"CD authentication failed"

When playing online, the game checks if your key is valid. Updates wont do any good fixing it.

---

What does work however, is looking under your couch for lost change. With your new found fortune, go to some ebay like website, and buy it for virtually nothing. Shops selling pc games might also have it in the sales corner.

Give me 4 or 5 months, then Renhalo will be released, which will be a major single play/coop for Renegade.
