Does anyone remember temple? My first released map which came out back in June?

Considering it did so well on so many websites I've decided to re-make it and release it as a .mix

It's gonna be called temple-revisited and it'll be finished in the next coupla days. Any sites wanna host it alongside the old version, post here [January 28, 2003, 03:05: Message edited by: killakanz]

sounds great - just make sure you fix the sections of the map (in back of the bases by the wall) - when you camara swings over it - you can look down and see the blue pit of hell....

oohYou downloaded it?Also, you might have noticed in the first version, the tip of the airstrip was floating above the ground about knee high, with it's own blue pit of hell under that! I fixed that too.

Also my own Temple and con yrds will be in this new version [January 28, 2003, 09:06: Message edited by: killakanz]

Yes that was a good map I think I still have it. That will be cool when you revise it.
