Alright, I'm having problems with my game. The problem is, everytime I put the disc in it will load and when I hit "play" The game don't load. Even when I try the setup thing in the folder, and type in the serials and it's done... It still won't load. =S Can anyone help me out? And this is for Yuri's Revenge.

More info would be nice. Operating System, system specs, anything else you've installed, other games work etc etc.
