Ever since I installed the new RG (1.0322) from www.renguard.com, my core patch updates have not been, well updating. I don't get an error message, it doesn't even try to update. I did not check "Stop core patch updates" or whatever, and I have restarted RG, and my PC countless times.

Fix plx

Erm first of all: are you sure it isn't installed yet?

Secondly, you can manually download core patches as well. Check here:
<http://www.renegadecommunity.com/page.php?link=rgfaq#14> (bottom)

If you already have the Core Patch, you don't need it again.

thankyou

i didn't have corepatches. i had to reinstall renegade becuase i was getting weird errors. i downloaded the new renguard off of www.renguard.com and it didn't automatically want to download the core patches, so i had to download manually..

anyways thanks for your help
