In fieldTS. Get XCC Mixer and extract the .dds, and rename it if necessary.

Also, take anything else like this to the mod sub-forum (that's for Renegade modifications, any form of modifying Renegade goes there).

u6795 wrote on Wed, 02 May 2007 01:23In fieldTS. Get XCC Mixer and extract the .dds, and rename it if necessary.

i can't, because xcc mixer begins reading all of the cnc related files, uses 2.5 gb of ram, then freezes. but somehow i had a chance to see the files in fieldts, but there were no tank related skins. more help pls.

That's not a different texture, that's a different model.

archerman wrote on Thu, 03 May 2007 07:03 please don't reply if u don't have any solutions.

I told you the solution, It's not a texture. You won't be able to use it with Renguard, Even so you'd  
have to do a bit of rigging work to get it as a replacement.
