I think he made new links later on in the thread.

If not, i'm sure many people dl'ed it so just wait for someone to repost it. Or pm him.

There's a Famas here:  
[http://www.3dvalley.com/models/models\\_weapons.shtml](http://www.3dvalley.com/models/models_weapons.shtml)

Scroll down. I dunno if that's the format you want. I am not sure of the polygon count either. But I think the specific model you are looking for was from turbosquid.com.

I searched there and here are quite a few:

Sorry for the double post (damn the Edit time limit) but this is important.

The models in the turbosquid links are FREE. You just need to Register there that's all.

He wants the Famas to replace the standard automatic assault rifle that the GDI and Nod soldier carries.

He says so here:

You can't just change the file type to .w3d. You have to convert it. You also have to give it the animations, etc.
