Hey man, Yeah, If you use a TFD serial, It's reports back with a "Invalid Serial",

 http://www.renegadeforums.com/index.php?t=msg&th=19368&start=0&rid=2 1684

Download the thing v00d00 uploaded and it should fix it for you.

No, it won't help. It doesn't work.

Many people have suddenly got this error recently. No one has a clue yet how to fix it.

wait..

God I'm such a retard!

delete woldata.key from C:/westwood/renegade

then hit start >> run >> regedit and hit okay

Then find HKeyLocalMachine\Software\Westwood\Renegade\Serial and right click Serial and hit modify, then take out the "-" in the serial then hit OK! And viola.. should be fixed.

Thank GhostShaw for this fix.. (Only do this if you use a TFD serial.)
