So I downloaded Scripts 3.2.2 and I went to play renegade later on and I alt tabed out and it crashed, I figured random. Now it kept doing this and I cant even put up a mod game for friends cause I cant alt tab, I can get out of the renegade window but when I try to get back into it, the renegade window disappears and the renguard window pops up. I thought this was fixed? If not where can I download the older scripts at that didnt crash on an alt tab. I uploaded the latest crash test, I have a total of 13.
