It is really cool, it is in .max and .w3d and it has a texture applied correctly to it in the .w3d. It came with no saved UVW unwrap so in .max the texture is not on it correctly. Is there any way to fix it because I want to bone it up because its COOL!!

You could import the w3d. Since it's not boned yet, I assume there will be no problem with bones getting messed up. The texture will stay on it the right way.

can you post a screenshot? or even better, the file?

edit, provided you have permission...

I believe he's talking about the one in the old assets package. The 100 polygon one.

Yeah its like 450 polliies or something! Pirfect for Role Play 2!

Thats why I wanna bone it up!

airbase map has the migs running on that its cool but its a vehicle deathmatch so not much can be done with it, plus it dies over time because of fuel

The only vechs on air base was f-15s (in exposed hangers), a-10s (around base and in unexposed hangers), harriers (on helipad), orcas (around base), and a c-130 cargo plane. (in a coner). Plus some humvees.

The ones you can fly, besides the orca, is called a harrier, not a mig.
