I made this about an year or two ago, never really got it shown to anyone expect to a few people who downloaded it from me.

The video was made with gameplay by myself in the Ultra and Uber Renegade Servers from www.mp-gaming.com

This was my second video that I made, its nothing fancy.

The video did have A good intro and credit at the start and end of the flim, but I had to remove them as I had to resize the video the hard way.

Anyways, free free to watch it, say what you may, but enjoy it because its Renegade.

<http://www.youtube.com/watch?v=bXqWOCFFFDA>

I let people try to guess the soundtrack for a while, unless you already know it.

Nice video, however I don't know how you can play like that. With all the extra mods. Either way nice video.

Nothing special.

Text is annoying. The video would actually be watchable without all the illustrating and 'lol's added

to it.

^ps i remember u kicked me from ur server, i had the nickname Bl4ckDmon and u kicked me fo hacks on ur server, like teh lolz!

Oh, How could I forget? I found out Troop is telling the truth about being pro and stuff...

OnTopic: The video is really laggy... Youtube is way too slow. :<

What advantage skins are you talking about`?

Only thing I can think of that you might be thinking about is the sbh skin, well that doesnt give any advantage, infact it makes sbhs even harder to see. :/

Other then that, dont know what you talking about.

Viking wrote on Sat, 19 May 2007 13:21It could be a little lower quality jeesh come on!!

Any lower quality it would make it unwatchable.

The text you see is not meant to "fade" or whatever its doing, in the final raw version of that, it would blink in then out, not that fading shit, thats due to the quality.

Though I enjoyed using the text bubbles as it was my second flim I ever made, wanted to see what I could do.

Well thank you for the comments, if there is ever a next time, I make sure to leave the text crap out.

<3 flame wars in my topic.

Any lower quality it would make it unwatchable.

Viking was being sarcastic, he meant you should increase the quality. Most ren movies i watch are all the same; low fps, blurry/jpeggy, have default 'blue' wmm overlays and have some kind of undesirable music playing in the background.

Although people seem to like it

Ah well, to increase the quality would increase the file size.

I do have a great quality video of it, but its about 350mb in size.

That file was just over 80mbs in size, YouTube allows 100mb, maybe I could had gone a little up, if I kept messing around with it.

But after all, this is just a little video, didnt wanna win any rewards for it, lol.
