I am making a new mod. I'm pretty good with le, but I don't have any knowledge of gmax. just wondering if anyone has skins, models for guns, characters, vechs, etc, or sounds for weapons, tanks etc.

They'd be useful for my future mod.

Doesn't really matter what it is. I only don't need map models, objects.ddb, and .lvls

Virtual Legos 2.

If you don't know what virtual legos is, then check out the first one.

Requires scripts 2.9x. I'll fix the scripts problem in the second one.

I have some custom skins that i do that dont suck, my best one is a simple recolor, but it's 1000 sydney's jacket costume, rather than being blue, it's red with nod logo, looks clean and has no problems.
