hi,

i was wondering if anyone could tell me how to make a vehicle drivable? i've gone on vehicle transitions and asigned vehicle_enter and vehicle_exit but it still wont allow me into it. is there something more im ment to do or am i doing it all wrong?

Did you set the seat count?
(Did you remove the Disable_All_Transitions script?)

Are you using an existing vehc from renegade or something you made?

JAmie

Try adding the bone Seat00 and Seat01 where the passengers sit. If you look at the Humm-vee you can see that they have thoes bones in there. So try doing that then export it and tell us if that works.

This is in RenX, so you asked but you don't care about a real answer.

sry i have been really busy to try it out and i didnt want to post a reply until i tested it out.

im in a bit of a pickle with trying to go into another colleage as ive finished with last one

just give me like a week and i should of tested it by then!

PS. no i cant do it now if ur about to ask im only repling now cos you PM me
