My textures always turn out black when I add them. I've been trying to a long time now and I still can't get them to show.

Edit: And if I don't use textures.. they often turn out gray.

Make sure when you save them they are DDS 5/3/Whatever number it is supposed to be as the original skin.

Make sure you have No Alpha [DXT1] checked?

If you created the model in max or gmax make sure the texture is applied there. Make sure that texture is either a tga or a dds. Make sure you have that very same texture in your LE mod folder.

It should then work. You may have to restart LE to get the texture to look right.
