Does anyone know of a good virus protection suite that's free?

(Has to have Firewall, Spyware, and Virus protection)

So you want a suite? If you want it to be free and half decent I'd recommend getting individual tools for each task.

Why even install one?, just use online scanners and every so often, install one, update, scan, uninstall.

There's no complete free suite AFAIK.

I'd use a combo of "AVG free", "zonealarm" and "spybot search and destroy"

I'd add to that with Ad-Aware.

I don't like Zone Alarm myself, Ashampoo firewall is alright, same with the old version of Kerio I have (doesn't let me hibernate though, now a biggie on a desktop)

i have symantec but not the really crappy one the clean stable norton anti virus corporate edition

and

sptbot search and destroy

ad-aware

hijack this

ECMO walware scanner

CWS shredder

spy blaster

stinger virus scanner

Windows Defender

I have Symantec too, and it works really well (it's by the same company but it's not Norton). It costs money however, and I only obtained the corporate edition because my dad has it at his work.
