I run RG everytime I start Renegade and I get this every freakin' time...

Before I'm kicked I get the message that I need RG to play in the server. I have it running so what's going on?

I have only seen this happen on a constant basis, when RG fails to connect to servers 1 and 2, RG server 3 does this to me, whats REALLY odd is that server 2 gives me no hell what so ever, server 1 causes major greef with me, and everything else below 2...

Doesn't happen to me on this PC, but sometimes happens on my mum's laptop (which doesn't have a functioning screen, battery or touchpad and the BIOS likes to change settings at random)

I just re-run the program, and it works. Meh
