im trying to egt mini guard tower to shoot green lasers that stay for a sec before they go away kinda like the ob hit and turrent to a blue ob strike

i messed with beams no luck

i messed with color no luck

i messed with the model no luck

i messed around for about 2 hours and no luck i still say the turrent bullet and agt bullet but its not what i want and i changed everything

iv tryed mixtures of changing models,warhead,color,weapon,ammo and eyt cant get it i think i may be missing somthing

i found this map which i got the idea heres some ss

i hd other ones to that had blue laser

PS im sriry its a big topic ut i tryed this for hours with no luck so im hopeing u guys can please tell me what im doign wrong?

I hope the next question will be you asking us how to type properly, spell correctly, use words in their correct context and use punctuation.

Although saying that, i had no problem reading your post.
