I would suggest using WOL for online play. As for playing the maps, just host a 1 player LAN Game to test them yourself, just be sure to uncheck "dedicated server" when hosting.Oh, and welcome to the forum!! [February 05, 2003, 19:40: Message edited by: gendres]

You can edit the skirmish cfg file in the data folder of Renegade and make it load the maps when you do Multiplayer Practise...

Yes, change your screen resolution to a higher number and it will shrink the programs view a little so the chopped button should appear.
