- Post all your best images / pictures here -

Here's one example: Nuke / Ion

That name I used is old, don't use it anymore

That is amazing, I guess I have competition on my hands.

Should I make a poll, to see who got the best pictures?

If so then 3 best pictures.

Give me some suggestions!

Sorry for the big pictures, will get the smaller version next time...

[View Forum Message](#) <> [Reply to Message](#)

The only way I could have made those SS was by using our custom commands and mod powers, one day rather than using them for hustice and testing haxxers, I got bored and Owned myself and started playing around and bothering both teams, then it became a craze where we all would do weird but funny stuff lol, sbh kane on gdi with all guns and 2000 health rocks.

Subject: Re: Fantastic Images

Posted by [R3N3G1DE](#) on Mon, 02 Jul 2007 23:51:58 GMT

[View Forum Message](#) <> [Reply to Message](#)

!debug, bery useful for debugging/developing (when you don't feel like killing the agt/ob and want to walk through the enemy base for some reason).

It was probably done in a different way here, but that's the command BI has for it.

(2000 health and 2000 armor that is)

[View Forum Message](#) <> [Reply to Message](#)

Actually I could kill any building with my mod powers, for testing or for fun (for fun being that only 2-3 people ingame and want to screw around)

all I have to type is !kill obb or !kill agt or whatever and it dies.

I can spawn any vehicle anywhere including inside of buildings, I can make myself have spy like spycrate with any character WITH the sbh glow, I can give myself any or all guns including nuke and ion (lol nod ion pwnt gdi, they thought it was fake) I can tranform myself into any character ingame, I can edit my health to any value except 0 or else I die, I can fly, spectate over people, and refill my own ammo and health and ion/nuke with a single command.....

So yea..thats why I have all those SS's of crazy impossible things

to give myself a character i type !gra frost cnod or cgdi 0-9

for vehicles: !gra frost mamy, !gra frost bike, !gra frost orca

(yes orca on under pwns)

for health: !gra frost health 1-2000

for all guns !gra frost all

refills: !gra frost refill

and to be kane !gra frost kane

to be spy: !gra frost spy

and to kill people without a message to irc: !gra playername boom

boom gives a player a HUGE explosion more devastating than a nuke or ion, though for some reason it doesnt effect buildings if a player dies this way inside or next to one.

the sbh on the obby was !gra frost fly and mamy on hon top was !gra frost mamy and then i drove it to be balanced on the roof or else half of the mamy was sticking off.

lol is this thru a bot or FDS?

Subject: Re: Fantastic Images
Posted by [AoBfrost](#) on Tue, 03 Jul 2007 16:26:42 GMT
[View Forum Message](#) <> [Reply to Message](#)

Ummm we had to redo some stuff in Nightregulator and cloudyserv for it to work, but the main coding is in scripts.dll, thats why we dont want to update to ssgm, we do, but dont cause then we gotta redo everything.

it works like this

We have a IRC bot which checks for commands from certain users (moderators) and if the proper command is said, it saves a txt file into a folder, then CS or NR looks into that folder and sends a command to the fds which reads info from the scripts.dll and works..

I think thats how it went...our main server uses NR but our last test server for the early mod let everyone use the commands, now only mods can in our server, but we can force the command to a player who doesnt have mod, such as !gra sadakur boom and you would die without knowing it, yet i get kill points

Subject: Re: Fantastic Images

[View Forum Message](#) <> [Reply to Message](#)

Well sad to say but i cant do that magic anymore, because tons of my commands were taken away due to me being only a half mod, now i can only spectate and fly around, tranform into a random character, and teleport anywhere...thats all.....they were afriad i'd "abuse" in big games, i dont but, in my SS's even if the game is big, it was because the higher mods did some stuff to me so i did some magic tricks too lol.

I've done that before with a drop mod. I took an apache with M00_disable_physical collision on it, flew it up there then dropped recon bikes. Because theres an invisible wall so apaches can't fly too high, the bikes will move ontop of that wall. Making it look like a flying recon

Sorry to burst your bubble, but...

Dragonade by vloktboky/Whitedragon can do that too, and this screen was taken in May 2006. Black-Cell admins using the restricted commands in Dragonade can do many other things, including creating a shower of vehicles from the sky, or changing the person's model or flying vehicle model into pretty much anything else (rocks, beacons, beacon effects, toilets, even entire maps - especially fun when the character is an SBH), and even more stuff. Unfortunately, they hardly ever break these commands out anymore, as they're usually only used after the conclusions of our once-abundant Regulars vs. Mods games.

Edit:

P.S. Yay, I'm posting during my family trip through parts of Canada. I missed you in Alberta, warranto, since the hotels charge too much for internet access

Also, since I'm in Canada right now, I don't have access to most of my screenshots and videos of fun junk, and I'm not going to download everything on the FTP to see what's worth posting. I'll post some more after I get back home next week.

Subject: Re: Fantastic Images

Unfortunately, they hardly ever break these commands out anymore, as they're usually only used after the conclusions of our once-abundant Regulars vs. Mods games.

Now with the .lua plugin that Dan made, Everyone can make there own special commands that do exactly what you said and more. ^^
