
Subject: Renguard problem having to do with "bandtest.dll"

Hey guys,

I was wondering if anyone had any suggestions. I have been playing renegade for many years.. during the summer. I normally install renguard at beginning of summer(s). I lost my disk and bought the first decade.

However, when I installed renguard, it started running its pre-checks and said that bandtest.dll is a corrupt file and promptly closed. I tried deleting it but it is needed to run my renegade. Any ideas?

-Spurs

That worked.. but now a new problem.

Now when I click on renegade, this happens:

<http://img101.imageshack.us/my.php?image=problem1qv4.jpg>

I put in the details, pressed ok, and the renguard screen comes up. However, when I press renegade, this happens:

<http://img514.imageshack.us/my.php?image=problem2ry9.jpg>

Keep in mind this didn't happen before renguard was installed.

-Thanks,
Spurs

Did you install the 3.x version of scripts.dll ? If so I would recommend installing 2.9.2 instead.
