Hey i'm using the lua plugin and I tested some scripts but they didnt work, roshambo even looked at them yet they still didnt work, when loading them up in the fds there was a error saying lua plugin would not work because it was compiled with ssgm beta 2, well for now, where can i get beta 2 to test for sure my mods work?

SSGM 2.0 Beta 2 is no longer available. It says the plugin MIGHT not work, but in this case it should work fine.

Well it may be my mods coding, but roshambo looked at it and corrected them here and there so I think since he's good at lua he wouldnt have made a mistake, so....I dunno.

be sure you have both the .dll and the .lua in your fds and add a line in SSGM.ini 01=LuaPlugin.dll (under plugins)

im running SSGM 2.0.1 and all works fine.
