Wrong nickname or password or serial or not configured correctly in server.ini.

Open up your server.ini under Rengade FDS/server and where it says serial put the serial number from the back of your renegade cd case in there, replacing the old one.

Yep either it's the serial or the Name/password..you can put your current xwis login and eliminate that part....they have a sticky for this here too..up top...check it out..may help.

I'm with trooprm02 on this one, which doesn't happen often.
