Inside of the old powerplant design, notice the rocket launcher pickup on the left

<http://www.cnc-source.com/forums/index.php?automodule=gallery&req=si&img =3078>

why is this mammoth tank sooo huge?

That mammoth tank is probably closer to "real" size.

Yeah this stuff is old, but great, TAS was a genius.

Renegade 2007 is using the concepts as reference for our characters, as the concepts had much more detail.

I just read about ren2007, it's for unreal not renegade lol, i got it confused with a mod where a guy was redoing all the models and skins to be better, anyways...I guess i still need to wait around and see if anyone will make the beta sniper.

No, the character designs are being taken from the concepts, but everything else is just an improvement from the original game (higher resolution, more details, higher polygon, etc.)

I hope it will be possible to port the Renegade 2007 mod to the PS3 version of UT. I heard news that it will likely be possible. Now THAT would give me another drug for next 3 years!!!

Come on, a shooter on a console will never work. Specially not renegade on a console.

A lot of people like shooters on consoles. Myself included. I have an Xbox 360, and the developers of Unreal Tournament 3 are saying that we might be able to port mods to it.

I'd be able to play a remake of my favorite game on a big LCD screen. That's wild...

Anyone have a screenshot of the other beta sniper? I know theres one that is similar to the current 500 sniper, but more advanced looking, it's like the beta sniper, but black and green, I think it was the second beta sniper which lead to the one we currently use.....

I think it would have been a lot better if Renegade had different weapons to both GDI and Nod. They should have had different Assault Rifles and the Black Hand Sniper should have had a unique laser-based sniper rifle. Needless to say, it would have been a lot cooler.

I think renegade should have a weapon mod, simillae to reborn's weapon system, both teams have different gun models if i am correct (may not be) but have them use the same damage and power and all that, but just different, using the gun makes gdi and nod seem more.....more like they both shop at the same gun market lol

GDI officer: Oh hey Kane

Kane: Hello future children of nod

GDI Officer: Haha good one...but i'm with gdi

Kane: Then you shall die one day!

Haven't you noticed the single player Black Hands sniper shoots a red beam?

But that doesn't make them lasers; even the Nod Assault rifle creates red tracers.

Yes but not as visible as the Nod sniper rifle, the rifle tracer/laser looks like a Railgun shot.

Er, other than the fact that you can clearly tell whether or not it's a rail by looking at them, Sure. We'll go with what you said.

I noticed it in-game, but never really thought about it until you said something. Now I'm gonna go back and play it. Just to go-HA!

No it's not.

It's a concept image of the sniper.

More or less, a beta.

Perhaps that was a beta to the Ramjet Rifle and not the Sniper Rifle? In the lower right corner, it starts with a letter R and looks like a letter A after that. If only IGN didn't shove their text there.

Actually, you might be right.  
The 50 caliber Sniper rifle they used in mythbusters had the EXACT same end to the barrel.  
My vote, is this is a RAMjet.  
Thanks for pointing that out.
