wondering if anyone knew a way i could disable taunts for myself when i play on servers.

I noticed that recently more servers have started to make the numpad key 0 a taunt and as i have my controls configured differently 0 is my jump key... it has already resulted in me no longer playing on 2 servers i like... the newest mp-gaming server and a co-op server.

I tried using a new key for jump but couldnt adapt to it,

just wondering whether anyone knows a way.

Go into your Renegade\Data folder, open keys.cfg and remove the line:
PoolInfo=Keypad_0_Key
