Quick question: Is there supposed to be an objects.gm file in that download? I just downloaded it for a fresh testing server and there is no objects.gm file, while the beta versions of ssgm included that file.

EDIT: NVM, just noticed in the readme it states that there is no longer any need for a modified objects file.

SSGM doesn't need the objects file so maybe that's why he didn't include it in the release.

Which is why I edited my post to say that after I realised it said that in the readme
