Info is in the readme >.>

It's an SSGM compatible server side mod that has a large AI Bot Spawner list with pre-configured AI Bots. It can be used to setup server side co-ops quickly. ^\_~

WOW! No replies... >.>

I spent so much time configuring a public AI Bot Spawner list (containing well over 300 spawners) and no one even looks at it. Thanks for the support guys... >.> ...makes me really want to puke.

I do believe you have to rename it to objects.aow...

The server side features that we included last time have been removed so people can make their own customizations (however, I think repairgun rates are still doubled :/ so it'll cause your server to crash if you run BIATCH, I'll fix in a newer version).

Anyways, in Level Edit you replace your old objects.ddb file with the new one and you'll have a large list of AI Bot Spawners (vehicles too) and you'll have normal vehicle spawners and beacon spawners in with the powerup spawners. All you do is make your co-ops (simple now, you select an AI Bot Spawner and click Make; REMEMBER: If there's no number on the end of spawner then it is infinite). After you've made your co-op you can take your modification and the objects.ddb (rename it to objects.aow or objects.gm) and put in your RenegadeFDS/Server/data folder and boot server.

Cheers!

afaik...it won't crash your server if you run BIATCH, it'll just auto ban all your players
