sry but my englisch isnt very good.

I need help with my renegade!!! If I clik on Westwood online" and then on "Server list" thei dont come a login-window! It just comes: "search for server..." and then it says that the search was to long.

CAn somebody help me? Please!!!

mfg cwodka

takes to long?

sounds like the progam might have timed out..

How many times did it do this?

Looks like XWIS had a bit of a problem, all seems to be fine now. If you still can't connect, make sure your firewall isn't blocking Renegade.

In all honesty, Windows firewall is virtually useless. I personally turn it off, but I have a hardware firewall and an anti-virus, and I don't visit dodgy sites (on this install of windows anyway)

Allow Renegade (And if you're using it, Renguard) through your firewall. The files you need to whitelist are game.exe, and if it exists, game2.exe, Both of these can be found in C:\westwood\Renegade, or if you're using The First Decade, C:\Program Files\EA Games\Command and Conquer (tm) The First Decade (tm)\Renegade\
