They do, but if you just ask for the code, and not learn the language then they might not reply...

We highly value learning and understanding. We're also still quite small, so help is somewhat limited, but we try to help as much as possible.

Lua is a *simple* scripting language that's been around for a while now. It was just recently implemented into Renegade by Dan (RoShamBo) through the LuaPlugin for SSGM. Lua allows you to add !commands to your server and a lot of other stuff. Look at the link below for a support forum.

ok, i just found it all out, could you help me? i followed the tutorial thing, downlaod, put them in renegade folder, then add the plugin into ssgm:

01=LuaPlugin.dll

I started up my server, typed: !build turret

And nothing happened, It should work right as the !build script is already in the lua file.. :S
