Ok, it is hard to help when we don't know the problem. "An error" is too general. Show us what the error is. Type what it says, take a screen shot.

We can't help unless your more specific.

Make sure you do this:

<http://www.renhelp.net/?mod=Content&action=view&id=Getting+Started>

Install the regular tools and replace the old Leveledit.exe with this one:

[http://www.renhelp.net/downloads/LevelEdit\\_Jonwil.zip](http://www.renhelp.net/downloads/LevelEdit_Jonwil.zip)

On any/all shortcuts to leveledit:

Disable Visual Themes

Disable Advance Text Services  
Enable Windows XP Sp2 compatibility - for vista users

(not sure if the first two are on vista but thats how we fix it on xp.)

EDIT: updated the getting started page for leveledit crash.
