Or serial isn't a valid one. Try another.

If not, get the direct connection details to the server of your wishes and direct connect.

Do you get a "message of the day" giving you an error? It's like a popup window saying "welcome to xwis blablabla".

Maybe post the contents of your hosts file? I dunno, maybe you have some random stuff in there

pointing you to the wrong place.

fyi, you can find the hosts file (on a standard xp/vista install) in c:\windows\system32\drivers\etc
-just open it with notepad/wordpad

Have you updated ren with the 1.037 patch and maybe some core patches too?

pee531 wrote on Wed, 29 August 2007 03:23no the message is at the bottom of the server room.
No, immediately following logging in, a "popup" like dialog will appear. Read it, and paraphrase it.
