I made a mod with walls in the map (you can see them on the screenshot) but when i place the map in my server (use XCC mixer and adding the map files to my original map) the walls do not show up that i made the switch works but the walls that i made do not show up and arent there

Help me out plz

thnx

Hmm, you shouldn't have any problem's with that object.

Open the mapname.lvl add the object's to where you want it, save it.

Now, open the xcc mixer, open the mapname.mix and now open the levels folder with the mapname.lvl and the other files, now move the mapname.ldd file into the mapname.mix

Then extract the mapname.mix to the server/data folder, start the game, start the server, join it.

Also, make sure you the objects.aow file you used in LE, is also being used in the server/data folder.

so i should only move the ldd in and not the lsd (lds)
in my islands.mix for example.
what i get now is invisible walls they are there aint they work they are just invisible so when i walk them i get lagged back.

You should only move the .ldd file, moving the .lsd file can cause the server to crash.

Have you made the walls stealth?

Don't know what you done to make them invisible. o.O

no i didnt make them stealth they are invisible in the server tho and when you walk through them you get lagged back
And i didnt mod them i kept them as they were standard so i really dont know what the problem is :S

IronWarrior wrote on Mon, 27 August 2007 07:20Have you made the walls stealth?

Objects cannot be made stealth via LE.. Scripts, yes; LE, no. (Unless you have a "Toggle_Stealth" zone - but that'd only turn inf and maybe vehs stealth. ^,^)

To do it, right click over the preset, go to Settings, scroll down the list and click the box "isstealthunit"

Don't know why I clicked it, this was last year, when I was working on coop.

Don't know if it work's on all the objects in there, I see no reason why not, as it worked on the sam site.

Am going sleep now,

Tiles are not server-sided. Try the objects again.

so i cant get those awesome walls to work in my server?
i mean the red torture walls they look so awesome.. :S

Oh and i did see them in another sniper server where they had those walls and were server sided.. :S

ffs! USE THE OBJECTS!
Objects -> Simple -> Simple DSAPO -> Simple_Sydney_SandM_Wall!
