Can the next BR version have a disable Renguard option in it please.

Thank you.

Can the next version of BR not work without RG please?

Thank you.

Won't happen: BR and Renguard are both BHS products, hence work together.

You can disable all RG-related commands and warnings, though.

I already have a file that disables RG, that was made by v00d00.

But, I would prefer an option in the config file.

I don't see a problem why there shouldn't be atleast an option.
