2 hours before i wrote this i had ren installed off the original cd with rg and cp and it worked fine, uninstalled everything, installed from the first decade... three times, got it to work, installed rg then tested on a bunch of different servers while un/reinstalling rg...

the rg is all normal and everything:
[00:22] Trying to connect to server #1...Connected!
[00:22] Secure link established.
[00:22] Welcome to RenGuard, QckNsilnt!
[00:22] To launch Renegade, please click 'Renegade'.

all seems good, i go into 5+ different servers and none of them say im running it or do any of the normal rg'ness msgs unless its to say im not running it....

happen to anyone else?
