Reinstall Renegade then.

Also, take into account i had several mods installed and they have registry keys. The important one is "InstallPath", you need to make that the directory of where you Renegade is installed.

euh the tut isn't correctly!

there is standing a / and there have to stand \ this is a lot of diferance !!!!!

If u changed this the program wil work as it have to work...

i hope i can help somewone with this!!!!

No, the windows directory system uses backslashes (\), not frontslashes (/). My tutorial is correct.
