Hey
I tried to follow this tutorial about adding Exhaust fumes to a vehicle
http://renhelp.net/index.php?mod=Tutorials&action=view&id=56

Now i done exactly what i had to do but when i exported the .W3d file to my data, and a few
seconds after i buy a Mammoth tank the Game will crash. Does anyone know what i have done
wrong?
Thanks

re-import, merge the exhaust boxes from the original one you exported for in game, delete all the
GmaX materials and replace them with RenX ones, enable collision and w3d settings where
required and reset xform on all objects. Now export

i will try that out, thanks
by the way, i have the w3d plugin, but i can only export w3d files, and not import any w3d files

well i tryed it out and there is 1 good thing,
that is , my game don't crash after buying a mammoth
but the smoke don't turn up, and for some reason my mammoth can't drive for- or backwards

i guess i deleted to much objects in renx? do you know it?

You have to edit the CUI for the importer.
Replace the renx ui folder with this one. Back yours up first.
Yes, this is my UI.

EDIT: Try downloading the models from Renhelp.net
