NVM

Here it is, offical westwood helipads.

<http://planetcnc.gamespy.com/View.php?view=Renegade.Detail&id=72>

so does any one know the model name of the helipad in always.dat I can only find the destroyed model "hel_ag_exp.w3d"

Edit: I found it its "enc_nhel.w3d" it was there right there in front of me

If you wish to search for something use RenegadeEx instead of XCC mixer as its search function searches for sections of the filename, not the whole like XCC.

Dthdealer wrote on Sun, 23 September 2007 06:52If you wish to search for something use RenegadeEx instead of XCC mixer as its search function searches for sections of the filename, not the whole like XCC.

It just has a different syntax, you have to use wildcards (*) in XCC Mixer.

enc_nhel.w3d is the model for the single player encyclopedia.

The other helipads linked to are the correct ones. There is no actual helipad in always.dat, the helipad is part of the terrain for the maps that use it.
