do you mean like "cmsg" (coloured message)

EDIT: *console command* "cmsg" ?

My friend made a mod for himself where when he PM's people on renegade it comes out pink lol, I'm not sure, it may be objects.dbb or some other coding, not sure, but it annoys me when he spams "i'm a barbie girl in a barbie world"

msgp is colored player msg... I dun think you can do colors via objects so that it works for everyone. It's only serversided.

i'm a barbie girl in a barbie world

lol how can he move when he's made of plastic, enamel and stuffed with air?

The commands is like so:

```
msgp *playername(or is it number?)* *red* *green* *blue* Message
```

The colours are from the rgb spectrum as far as i know. Simply a number from 0 to 255 is required for each, showing the intensity of the colour.

EDIT: for pink he would use the colours 255 0 255

I got it, He has his own IRC bot for his own custom commands ingame which are useless but funny sometimes, when he sends a PM or something to a player, I guess his own IRC bot reads it and changes it somehow, because looking in IRC, when he pm's me ingame, the PC is shown it's being sent by the IRC bot automatically, so it's like it cancels his and replaces it with his own

color.
