As I didnt find any solution to this prob I forced myself to post it here.

After installing the latest RG I am not anymore able to get into any game going over Gamespy.
(Well I even cant start a single session through this!!! - Same messages!)

So what happens ...

[17:03] Warnung: Es wurde kein WOL Name gefunden. Die Verbindung zu WOL kann vielleicht nicht hergestellt werden.

[17:03] Versuche zu Server #1 zu verbinden...Verbunden!

[17:03] Sichere Verbindung hergestellt.

[17:03] Welcome to RenGuard, !

[17:03] To launch Renegade, please click 'Renegade'.

[17:03] Ihre Verbindung zu RenGuard wurde beendet,

The RG screen stays open, just bein able to close it. RG just closes the connection. No error - just closes.

It happens on W98SE as well as on W2K. It happens when Firewall is up and if its down ...

So whats up with this?
