Hi I downloaded airmod for Renegade the demo. After extracting and so on, I tried setting up a server which i did succesfully however it wasn't using air mod. Do i have to activate air mod while in the game ? ThankyouLucy

There should be an option when setting up your server where you can pick what mod you want to play.

The airmod for the demo is a modded c30 drop text file that goes into the data directory of your demo. You can get it at a few places and theres even a program to make your own. But i'm pretty sure it's just the text file for the demo that gets used when you host.Fact: westwood left vehicles like the orca in the demo always.dat even though they never appear in the demo at all.
