Actually it uses what are called Generic Units in Gmax:

(any other measurement setting will not coordinate right with level editor's system.)

If you open some of the .gmax files from westwood FTP, like the SP buildings, they are all metric.
You'll notice the m next to all of the measurement boxes.

That's for gmax.

LE uses crashes for measurement units.

Level editor uses generic units, so for making cinematics, or positing stuff, generic units are a must.

Isn't metric converted to generic in the w3d?

Dthdealer wrote on Sun, 14 October 2007 02:46Isn't metric converted to generic in the w3d?
Can't be, otherwise my cinematics would never match up as I make them all in RenX.
