When ever i go to install renegade, Everything is fine until it hits always.dat.

It freezes at 8%. Is there anyway for me to down load the always.dat to skip the process of the download?

I need help badly

Seems like your cd or your cd-rom drive is broken. A new copy of renegade should only cost 5-10 \$ (or borrow a friend's copy?).

Or you could look for an ISO of the Renegade installation CD.

Try creating an ISO Image with ISObuster

[www.isobuster.com](http://www.isobuster.com)

Be patient, this can take even hours to read scratched discs. But it should work. AFAIR the program reads Cluster by Cluster and therefore you still get the Opportunity to burn the Image on a fresh CD -including the Safedisc v2 Copy Protection-.
