Add him to the wall-of-shame list Crimson, he's attacking a product in its tech support area.

Want to attack Renguard, go post in the "Hot topics" forum, where posts can be arguments. Ok?

Not even the coders of Renguard could answer that. WE NEED DETAILS. What are you doing when it crashes? Does windows pop up it's "Submit bug report" thing?

Just incase you are blind. And no, Carrier is not a member of the RG team, he was just asking you the questions that the RG team would need answered to be able to help you.

Does the RenGuard window have any error messages in it, or messages saying something like 'You were kicked for xyz' or 'Unauthorised Renegade instance terminated' or 'Error 00000' etc. Just saying 'it crashes' is NOT going to get you any help, because for all we know it could be crashing due to an 'Out of cheese' error.

I'd like to make a suggestion.

Uninstall Renguard,

Back up custom maps,

Uninstall Renegade,

Reinstall Renegade,

Apply Patch 1.037,

Reinstall Renguard,

Copy custom maps,

Allow Renguard to upgrade Renegade to Core Patch 2,

Download jonwil's updated scripts from his sourceforge page and apply them.

Try again.

BartGg wrote on Thu, 25 October 2007 21:32heres what happens.. i playing.. and its crashes str8 back the the RenGaurd programme

That's probably a Renegade crash, not a renguard crash. RG just seems to be the first thng u see after Renegade crashes. That is: if RG doesn't give any error messages.

Install these

DO NOT USE BLOOM OR SHADERS, from what I remember of your PC, it won't handle it.

We need exact error messages, or we're as stuck as you are. Help us help you...

Copying and pasting the Renguard log bit at the base of its window would help.

Wait about twenty seconds before starting Renegade after starting RenGuard.

It's "fail".

I've stopped using RG myself, fed up with the bullshit crashes out of no where.

Yes. Please do not bump old topics and go and post here.

Include details of which operating system you're running, what your hardware is, and what sort of a crash (black screen? Back to desktop?)
